DUNE-214 SOL 3

Ref 00047

Does the habitat have a smell by now, and is anyone willing to describe it honestly?

THE CREW · REPLY

Like a greenhouse wearing a raincoat. We have stopped noticing, which worries us more.

CRATER-697 SOL 2

Ref 00031

What do you miss first — weather, or the idea that you could go outside if you wanted?

THE CREW · REPLY

The idea. Weather is just news from a planet we are not on.

CRATER-697 SOL 3

Ref 00052

If the seedling has a name now, we deserve to know it.

AWAITING THE CREW · VISIBLE ONLY TO YOU

Crossing now — 00:00:12 until it reaches the habitat.

THE CREW LOG, THAT SOL

SCIENCE OFFICER

Condensation on the north window again this morning — filmed it before wiping, because the pattern says more about our air than the sensors do. Germination tray B shows first green. We named the seedling anyway. You are not supposed to name them.

HEALTH OFFICER

Morning workout done to one song on repeat. Calories 5,010 · steps 6,420. The kitchen smells of rehydrated onion, which counts as an event now.

9 OF 39 ENTRIES WRITTEN

SOL 001

COMMUNICATION

SOL 1

Hatch sealed at 09:00. The sound it makes is smaller than you expect — a click, then thirteen days. First messages from Earth already waiting.

SCIENCE

SOL 1

Baseline census of everything that breathes, drips or hums. The habitat is loudest at night, which nobody warned us about.

HEALTH

SOL 1

Everyone slept badly and reported sleeping fine. Filed both facts.

SOL 002

COMMUNICATION

SOL 2

Answered eleven messages. A child asked if Mars has weather. Spent an hour on that one; it deserved it.

SCIENCE

SOL 2

Water recovery running two points under plan. Watching, not worrying. Yet.

HEALTH

SOL 2

[PLACEHOLDER] Daily blog — health officer, SOL 002. Cue: how the body notices confinement first.

SOL 003

COMMUNICATION

SOL 3

The board is filling with callsigns. CRATER, DUNE, HALO. Earth is out there and it types fast.

SCIENCE

SOL 3

Condensation on the north window again. Filmed it before wiping — the pattern says more about our air than the sensors do.

HEALTH

SOL 3

Morning workout to one song on repeat. 5,010 kcal · 6,420 steps. Onion smell: an event.
