RED DUST CITY

CARE AS A FINITE RESOURCE

CENTRAL QUESTION

The world needs care. But what if care was a finite resource – how would we distribute who and what gets cared for, what gets neglected?

MORNING

Classify the following situations:

- Robot dog needs charging
- Insects need feeding
- Booboo makes unusual noises
- A plant is dying
- Robot dog refuses to enter the EVA
- Booboo appears depressed

For each situation, discuss:

1. Is this a problem?
2. Does it deserve our attention?
3. Who is responsible?
4. Who gets priority handling?

AFTERNOON

Throughout the day, document acts of care:

- toward a human
- toward a living being
- toward a machine / object

Log the time and what happened.

EVA

CARE MAP

Who cares for a place that belongs to all of us / belongs to none of us?

- Document disrepair, waste, graffiti, things that are broken or missing
- Humans that need care (e.g. difficult terrain, a person sitting alone)
- Dead insects / plants, etc.

QUESTION FOR THE COMMUNITY HOUR

What did you care for today?

Um was hast du dich heute gekümmert?

MATERIAL – WHAT DOES THIS NEED

Stopwatch; paper & pen or laptop;
possibly a voice recorder;
photo paper; printed pictures
