RED DUST CITY

WATERWAYS

CENTRAL QUESTION

Humans cannot survive without water. How do we take care and notice water?

MORNING

Map where water enters and leaves the Habitat: Where is water used in the Habitat? Where is water lost? Where does it flow? Where does it stand still?

Track water consumption by plants, crickets and human consumption.

Ask ground control for average rainfall on Marktplatz a day/a year

AFTERNOON

The Journey of a Drop

Draw a visual map of the journey of a single drop of water as it travels through the habitat, informed by the learning of the morning – make more than one drawing for more than one journey

EVA

WATERWAYS MAPPING

- visible places
- rain gutters
- drains
- fountains
- places where water can be collected or is lost

Ask: "How would our water consumption change if we could only use the water of our immediate surroundings?"

QUESTION FOR THE COMMUNITY HOUR

How are you saving water? What is your favorite spot with water in the city?

Wie sparst du Wasser in deinem täglichen Leben? Was ist dein Lieblingsort mit Wasser in der oder um die Stadt herum?

MATERIAL – WHAT DOES THIS NEED

Camera; maybe photo printer; paper for mapping or laptop.
