

MARS! / SCIENTIFIC MISSION

MISSION No.

8

RED DUST CITY

SCHOOL OF MCGYVER

CENTRAL QUESTION

If we can't buy what we need, can we invent, make, repair or reuse?

MORNING

Make something that improves life in the Habitat.

Document:

- what material was chosen
- what was disregarded
- what resources were used
- how long it took
- what was made
- did it work?

AFTERNOON

"Make something that tells the story of life for someone who has never been here."

Document the process:

- research
 - materials used
 - concept
 - production
 - documentation
 - presentation
- "artwork"

EVA

Fictitious scenario: THE MARKETPLACE AS RESOURCE

"Name 5 objects from the marketplace that could be used as a resource. Which ones and why?"

- material
- size, weight, value (e.g. place – waste? in Habitat?)

Make something that tells the story of life for someone who has never been here.

QUESTION FOR THE COMMUNITY HOUR

Which object from Earth would you take with you because you cannot live without it? If you could only take 1 thing, what would it be?

MATERIAL – WHAT DOES THIS NEED

Craft materials (scissors, glue, gaffa tape; toolbox); photo paper; photo printer; voice recorder.
