Mission notes

LOG
Airlock cycled twice for the EVA.

Habitat

The Habitat tab of mission control for this day, as it stands at the time of this record: the schedule, the meals, the steps and calories, the inventory levels and the power. The same tab is written to the readings log automatically at the end of each day (the daily record, /archive/readings.zip).

Inventory levels

As the tab shows them: available at the start of the day, used today, left for the future. "counted" means the figure was filed for this day; "carried" means it follows from the day before at its draw.

Resource	Available amount	Amount used today	Amount left for future	Unit	Used figure	Left figure
Potable water	0	41	512	L	counted	counted
Food rations	0	0	0	days	carried	carried
Oxygen reserve	0	3.5	0	%	counted	carried
CO2 scrubber cartridges	0	0	0	units	carried	carried

Habitat sensors

Every channel as it is named on the dashboard: the sensor node (the Habitat panel), the station's own channels, and the habitat hardware (the Habitat hardware panel). First each channel's lowest, highest and mean reading over the day and how many readings that is; then every reading, as stored.

Habitat · sensor node
