MARS!platz

Communication Station

The mission record

MARS — HABITAT ONE

The run	Saturday 19 September – Thursday 1 October 2026 · 13 days · Europe/Berlin
Days recorded	5 of 13 (day 005 in progress)
Exchanges published	33
Messages from Earth	104 from 80 callsigns · 0 rejected · 71 awaiting reply
Crew log	4 entries written · 2 states filed
Media sent out	0 files · 0 B · 0 photographs, 0 video, 0 sound, 0 documents
Habitat readings	0 stored
Days sealed	0 of 13
Readings log	43 files · 264 kB · every reading ever pulled, in /archive/readings.zip
This record	generated 2026-09-23 11:18 UTC

This record holds only what was entered on the station and what its sensors measured, day by day: the schedule as it was run, the meals, the stores as they were counted, the power and the crew's figures as they were filed, what the crew wrote and sent out, the states filed for them, and every exchange with the public. Nothing in it is generated — no chart, no projection, no total, no figure carried from one day to the next, and no plan for a day that has not come. The photographs are placed in the entries they were sent with; the originals, byte for byte, are in the media ZIP under the hashes printed here.

The mission

MARS — HABITAT ONE. Saturday 19 September – Thursday 1 October 2026, 13 days, on Europe/Berlin time. Three people inside a sealed habitat, and a channel between them and everyone outside it.

Crew

Designation	Role
COMMUNICATION OFFICER	Relay · messages from Earth
SCIENCE OFFICER	Research · habitat systems
HEALTH OFFICER	Crew health · life support

The stores tracked

What the habitat set out with, as written in crew-and-inventory.json. Each day's counts are in that day's record; a store not counted on a day has no figure for it.

Store	Category	Carried in	Unit	Warning below	Critical
Potable water	Consumable	640	L	90	yes
Food rations	Consumable	14	days	3	yes
Oxygen reserve	Life support	98	%	40	yes
CO2 scrubber cartridges	Life support	12	units	3	yes
Battery charge	Power	62	kWh	14	yes
Dust filters	Equipment	9	units	2	
Medical kits	Medical	6	kits	2	
Repair materials	Equipment	48	kg	8	
Germination trays	Research	8	trays	2	

Monitored channels

The habitat's sensor channels as configured in sensors.json: the channel code, what it measures, its unit and the bands the station reads it against.

Channel	Metric	Unit	Expected band	Hard limits	Shown
CH-01	Habitat temperature	°C	18.5 – 24.5	14 – 30	yes
CH-02	Relative humidity	%	32 – 48	20 – 70	yes
CH-03	Carbon dioxide	ppm	400 – 1200	0 – 2500	yes
CH-04	Air pressure	hPa	990 – 1025	960 – 1050	yes
CH-05	Air quality index	AQI	0 – 50	0 – 150	yes
CH-06	Volatile organic compounds	ppb	0 – 400	0 – 1000	yes
CH-07	Particulates PM2.5	µg/m³	0 – 15	0 – 55	yes
CH-08	Radiation dose rate	µSv/h	0 – 0.5	0 – 2	yes
CH-09	Cumulative dose	µSv	0 – 60	0 – 200	yes

How to read this record

Days run in order, and only the days that have happened are here. Each holds the schedule with every task's status as it stands, the meals as entered, the stores counted that day with the figures as they were written, the power and the steps and calories as they were filed, the mission notes, the crew log with its photographs in place, the states filed for the crew with the value chosen and the sentence the station shows for it, every exchange published that day, what was sent out, and the day's sensor summary — each channel's lowest, highest and mean reading and how many readings that is. No figure is totalled, projected or carried from one day to the next. "The crew log" gathers every blog entry in full, in order; "The complete correspondence" lists every message that reached the station, including those never published; "Media" lists every file with its SHA-256, which can be checked against the ZIP at `/media/export.zip` with `sha256sum`. Every reading the station ever pulled — each poll of the sensor node, each batch posted to the ingest endpoint, the stores and figures as they changed, each day's summary — is kept as one JSON file per pull in the readings log, downloadable whole at `/archive/readings.zip`.

The days

5 of 13 days recorded, each whole: the schedule as it was run, the meals, the stores counted that day, the power and the crew's figures as filed, the mission notes, the crew log with its photographs, the states filed, the exchanges, what was sent out and the day's sensor summary. A day that has not happened has no chapter.

12:02	HEALTH OFFICER	25	SETTLED	settled, working steadily		control
13:06	SCIENCE OFFICER	75	TENSE	tense, short with the others		control

Exchanges

RELAY-328 · Ref 00001 · day 005 · 12:20 · #QUESTION #PERSONAL #HUMOUR

Functional check from the restyle — does the dome still open?

COMMUNICATION OFFICER — Quieter, but never quiet. The recovery loop runs all night; you learn to sleep on it.

Signal delay stored with the message: 14 min 19 s one way at 1.722 au · reply published day 004 13:27

CRATER-487 · Ref 00002 · day 005 · 12:21 · #QUESTION #PERSONAL #HUMOUR

Functional check from the restyle — does the dome still open?

SCIENCE OFFICER — Four of twelve on tray 3 this morning. First shoots. We photographed them for the science log.

Signal delay stored with the message: 14 min 19 s one way at 1.722 au · reply published day 004 13:27

BASALT-303 · Ref 00003 · day 005 · 12:28 · #QUESTION #PERSONAL #HUMOUR

Functional check from the restyle — does the dome still open?

COMMUNICATION OFFICER — Down to 17 degrees before the heating cycle kicks in.

Signal delay stored with the message: 14 min 19 s one way at 1.722 au · reply published day 004 13:36

BASALT-300 · Ref 00004 · day 005 · 13:27 · #QUESTION #PERSONAL

Does the habitat get quieter at night, or is it always the same hum? I keep wondering what you fall asleep to.

HEALTH OFFICER — It changes how much we drink, not how long we stay. Rationing review is at 13:30; we will publish the numbers.

Signal delay stored with the message: 14 min 19 s one way at 1.722 au · reply published day 004 13:27

AZIMUTH-459 · Ref 00005 · day 005 · 13:27 · #SCIENCE

What did the germination check show — did anything come up on tray 3 yet?

COMMUNICATION OFFICER — There is one speaker and three opinions. The health officer's list wins on workout days.

Signal delay stored with the message: 14 min 19 s one way at 1.722 au · reply published day 004 13:27

CIRRUS-163 · Ref 00006 · day 005 · 13:27 · #PERSONAL #HABITAT

Good luck with the rationing review. We're counting the days with you from Karlsruhe.

SCIENCE OFFICER — Dense, but it keeps.

Signal delay stored with the message: 14 min 19 s one way at 1.722 au · reply published day 004 13:36

ELYSIUM-386 · Ref 00007 · day 005 · 13:27 · #QUESTION #HABITAT #SCIENCE

If the water loop is running four per cent below spec, does that change how long the mission can run?

HEALTH OFFICER — Weather.

Signal delay stored with the message: 14 min 19 s one way at 1.722 au · reply published day 004 13:36

ANCHOR-551 · Ref 00008 · day 005 · 13:27 · #HUMOUR #PERSONAL

Do you ever play music in there? Which playlist gets the most votes?

COMMUNICATION OFFICER — Four shoots on tray 3, more expected.

Signal delay stored with the message: 14 min 19 s one way at 1.722 au · reply published day 004 13:36

ANCHOR-370 · Ref 00009 · day 005 · 13:27

Sending you a sunrise from the Rhine. 6:41, cold, clear.

SCIENCE OFFICER — The CO2 curve every time someone laughs.

Signal delay stored with the message: 14 min 19 s one way at 1.722 au · reply published day 004 13:36

ELYSIUM-493 · Ref 00010 · day 005 · 13:36 · #QUESTION

How cold does it get at night in there?

LATITUDE-320 · Ref 00024 · day 005 · 13:37 · #QUESTION

Do you dream about the outside?

SCIENCE OFFICER — Every night.

Signal delay stored with the message: 14 min 19 s one way at 1.722 au · reply published day 004 13:37

BASALT-625 · Ref 00025 · day 005 · 13:37 · #PERSONAL

What did the health check say today?

HEALTH OFFICER — All three within range.

Signal delay stored with the message: 14 min 19 s one way at 1.722 au · reply published day 004 13:37

ELYSIUM-493 · Ref 00026 · day 005 · 13:37 · #HUMOUR

Any music tonight?

COMMUNICATION OFFICER — Health officer's list, workout day.

Signal delay stored with the message: 14 min 19 s one way at 1.722 au · reply published day 004 13:37

IRON-978 · Ref 00027 · day 005 · 13:37 · #SCIENCE

Do you count the days or the sols?

SCIENCE OFFICER — Sols, since day two.

Signal delay stored with the message: 14 min 19 s one way at 1.722 au · reply published day 004 13:37

LATITUDE-320 · Ref 00028 · day 005 · 13:37 · #HABITAT

How is the water loop today?

HEALTH OFFICER — Four per cent below spec, holding.

Signal delay stored with the message: 14 min 19 s one way at 1.722 au · reply published day 004 13:37

BASALT-625 · Ref 00029 · day 005 · 13:37 · #QUESTION

What do you see from the window, if there is one?

COMMUNICATION OFFICER — There is a slit. Mostly the gallery lights.

Signal delay stored with the message: 14 min 19 s one way at 1.722 au · reply published day 004 13:37

ELYSIUM-493 · Ref 00030 · day 005 · 13:37 · #PERSONAL

How many steps did you take today?

SCIENCE OFFICER — About two thousand each.

Signal delay stored with the message: 14 min 19 s one way at 1.722 au · reply published day 004 13:37

IRON-978 · Ref 00031 · day 005 · 13:37 · #HUMOUR

Which experiment are you most hopeful about?

HEALTH OFFICER — The aeroponics batch.

Signal delay stored with the message: 14 min 19 s one way at 1.722 au · reply published day 004 13:37

LATITUDE-320 · Ref 00032 · day 005 · 13:37 · #SCIENCE

Is the hum louder near the power rack?

COMMUNICATION OFFICER — Yes, and warmer.

Signal delay stored with the message: 14 min 19 s one way at 1.722 au · reply published day 004 13:37

BASALT-625 · Ref 00033 · day 005 · 13:37 · #HABITAT

What would you change about the habitat?

SCIENCE OFFICER — A second door.

Signal delay stored with the message: 14 min 19 s one way at 1.722 au · reply published day 004 13:37

71 more messages sent from Earth that day were not published — 0 rejected, 71 still awaiting a reply. All of them are in "The complete correspondence".

The crew log

Everything the crew wrote, in full, day by day and officer by officer — the same text as in each day's record, gathered so the log can be read straight through. Photographs sit where they were placed in the entry; video and sound are listed. An entry held back from the public station is included and marked, because this is mission control's record.

Day 001 · Saturday, 19 September 2026

Everyone Had kind of shit healtj.

Day 002 · Sunday, 20 September 2026

SCIENCE OFFICER

Written 2026-09-22 12:20 · last edited 2026-09-23 13:13 habitat time

Habitat breakdown.

The complete correspondence

Every message that reached the station, in the order it was sent: 104 from 80 callsigns — 33 published with a reply, 0 rejected, 71 still awaiting a reply, 0 in transit. Messages sent before the habitat was occupied carry day 000.

Day 005

RELAY-328 · Ref 00001 · day 005 · 12:20 · #QUESTION #PERSONAL #HUMOUR · published

Functional check from the restyle — does the dome still open?

COMMUNICATION OFFICER — Quieter, but never quiet. The recovery loop runs all night; you learn to sleep on it.

Signal delay stored with the message: 14 min 19 s one way at 1.722 au · reply published day 004 13:27

CRATER-487 · Ref 00002 · day 005 · 12:21 · #QUESTION #PERSONAL #HUMOUR · published

Functional check from the restyle — does the dome still open?

SCIENCE OFFICER — Four of twelve on tray 3 this morning. First shoots. We photographed them for the science log.

Signal delay stored with the message: 14 min 19 s one way at 1.722 au · reply published day 004 13:27

BASALT-303 · Ref 00003 · day 005 · 12:28 · #QUESTION #PERSONAL #HUMOUR · published

Functional check from the restyle — does the dome still open?

COMMUNICATION OFFICER — Down to 17 degrees before the heating cycle kicks in.

Signal delay stored with the message: 14 min 19 s one way at 1.722 au · reply published day 004 13:36

BASALT-300 · Ref 00004 · day 005 · 13:27 · #QUESTION #PERSONAL · published

Does the habitat get quieter at night, or is it always the same hum? I keep wondering what you fall asleep to.

HEALTH OFFICER — It changes how much we drink, not how long we stay. Rationing review is at 13:30; we will publish the numbers.

Signal delay stored with the message: 14 min 19 s one way at 1.722 au · reply published day 004 13:27

AZIMUTH-459 · Ref 00005 · day 005 · 13:27 · #SCIENCE · published

What did the germination check show — did anything come up on tray 3 yet?

COMMUNICATION OFFICER — There is one speaker and three opinions. The health officer's list wins on workout days.

Signal delay stored with the message: 14 min 19 s one way at 1.722 au · reply published day 004 13:27

CIRRUS-163 · Ref 00006 · day 005 · 13:27 · #PERSONAL #HABITAT · published

Good luck with the rationing review. We're counting the days with you from Karlsruhe.

SCIENCE OFFICER — Dense, but it keeps.

Signal delay stored with the message: 14 min 19 s one way at 1.722 au · reply published day 004 13:36

ELYSIUM-386 · Ref 00007 · day 005 · 13:27 · #QUESTION #HABITAT #SCIENCE · published

If the water loop is running four per cent below spec, does that change how long the mission can run?

HEALTH OFFICER — Weather.

Signal delay stored with the message: 14 min 19 s one way at 1.722 au · reply published day 004 13:36

ANCHOR-551 · Ref 00008 · day 005 · 13:27 · #HUMOUR #PERSONAL · published

Do you ever play music in there? Which playlist gets the most votes?

COMMUNICATION OFFICER — Four shoots on tray 3, more expected.

Signal delay stored with the message: 14 min 19 s one way at 1.722 au · reply published day 004 13:36

ANCHOR-370 · Ref 00009 · day 005 · 13:27 · published

Sending you a sunrise from the Rhine. 6:41, cold, clear.

SCIENCE OFFICER — The CO2 curve every time someone laughs.

Signal delay stored with the message: 14 min 19 s one way at 1.722 au · reply published day 004 13:36

ELYSIUM-493 · Ref 00010 · day 005 · 13:36 · #QUESTION · published

How cold does it get at night in there?

HEALTH OFFICER — We took a vote. No comment.

Media

Every file the crew sent out: 0 visible (0 B). Each is stored once under its SHA-256 in the station-data volume and is in /media/export.zip under its filename; sha256sum on any copy must give the hash printed here.

Nothing has been sent out.

Audit trail

What mission control did, as the station logged it: replies, rejections, entries, states, uploads, edits, the reset.
